

Triflo Premier

CUSTOMER GUIDANCE

This turnstile combines elegance with the ultimate in security. It complements and enhances many corporate environments that need to combine protection with aesthetics.

This turnstile can also be fitted with a stylish drop arm as it offers completely free and unhindered exit in an emergency situation, as the battery power pack (which can be either built into the turnstile unit or situated remotely) unlocks the arm from the horizontal position and drops the arm down to a vertical position. The added benefit to this turnstile is the automatic reset once the arm has been dropped, as the mechanism rotates on itself and then drops the arm back into position.

Standard and optional features;

Design:

- Half height turnstile for internal use
- 304 grade stainless steel unit
- 316 grade stainless steel arms
- Curved end panels
- Can be easily integrated with railings/barriers providing the same look and feel throughout the desired area

**Operation:**

- Manually operated arms or drop arm functionality
- Available as mechanical only unit or controlled in either or both directions
- Can be controlled via any access control unit which gives out a volt free contact (supplied separately)
- Free rotation on power failure or activation of fire alarm
- 1 set of red/green directional indicators are included in the controlled version
- Can be alarmed with under or over sensors
- Unlocking mechanism adjustable from 2-32 seconds

Order Information

All controlled units are supplied complete with Push Button (Foot Pedal operation is an available option). Other control methods by quotation only.

If controlled unit required, please specify controlled direction, for example controlled entry / free exit.

Please specify at time of order if left hand or right hand unit required.
